

BLOODBORNE PATHOGENS

COURSE OVERVIEW

This class will cover the OSHA Bloodborne Pathogens Standard (29 CFR 1910.1030). Any employee who might be exposed to blood or certain other bodily fluids while performing their job is required to understand the potential hazards of such exposures and receive training on bloodborne pathogens.

LEARNING OBJECTIVES

Topics for this class include:

- An explanation of the Bloodborne Pathogens Standard.
- Epidemiology and transmission of bloodborne pathogens
- Appropriate work practices, procedures, and measures to control exposure.
