

LOCKOUT/ TAGOUT

COURSE OVERVIEW

Lockout/ Tagout, is a class that will help protect employees from potentially hazardous energy. Employers are required by OSHA to develop a program to properly train all employees who may come in contact with hazardous energy and to record that training.

LEARNING OBJECTIVES

Topics for this class will include:

- Requirements of the OSHA standard 29 CFR 1910.147.
- The essentials of the standard and its associated programs.
- Energy control procedures.
- How to implement and maintain a functional program.

AUDIENCE

Employees and Employers
