

For Students – Tegrity Campus 2.0 (Recordings)

Tegrity Campus is used by instructors to provide students with video, audio, and screen capturing recordings. Tegrity is accessible anywhere via Blackboard's course management system.

Check to make sure your computer meets the necessary requirements.

Operating systems:

- Windows Vista or XP (Windows Media Player 6.4+)
- Mac OS X

Browsers:

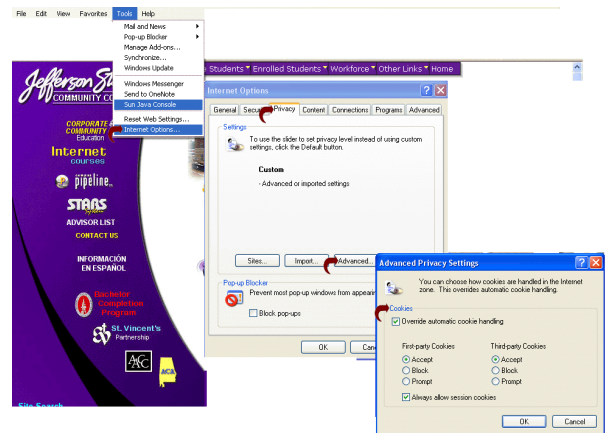

- MS Internet Explorer
- FireFox
- Safari

Note: Check to make sure 'Pop Up Blocker' is not turned on. The Tegrity viewer is a Java applet, which avoids installation and browser security issues caused by proprietary plug-ins of other solutions. There is an automated "browser test" to verify components for first time use. Both PC and Mac viewers will be prompted with the "Trust Tegrity" message box when viewing Tegrity sessions the first time.

Note: Check to make sure audio volume is working and on.

For Internet Explorer browsers:

- Check pop up to install Active X.
- Be sure that you have Cookie Handling enabled. You can check your Advanced Privacy Settings by selecting the Browser Tools menu/Privacy Tab/Advanced. Be sure "Override automatic cookie handling" and "Always allow session cookies" check boxes are selected when using Tegrity.

To view Tegrity recordings:

1. Click on the Course Videos (Tegrity) link in your course. The Tegrity Campus Viewer Screen will appear with your instructor recordings.

Note: You can also 'My Tegrity' link to view recordings from other courses that you are currently enrolled.

Note: To move from page to page within the classes listed, use the navigation tools at the bottom of the screen.

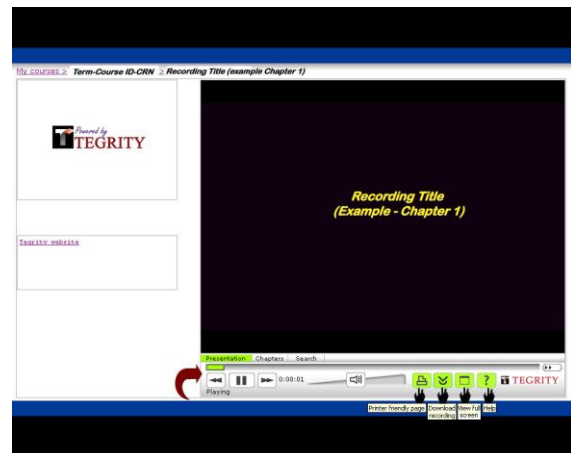

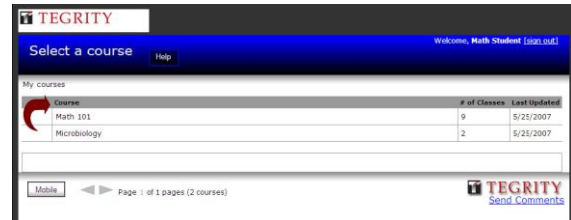

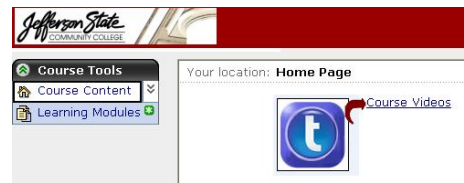

2. To launch the recording, click the Play button beside the name of the recording or the Plus Sign button to review the chapters (shown in thumbnail view) in a recording.

Note: Slides will automatically advance. If it does not load the first time close your Browser and try again.

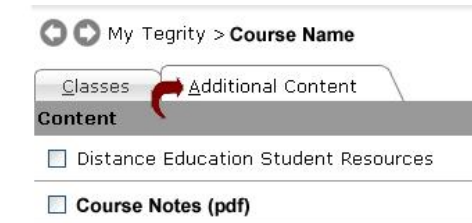

4. You can use the mouse roll-over to select from the following options: Print, Download Recording, View Full Screen, and or Help.

Course Videos/Tegrity

Additional Content:

Instructors may post additional notes or URL links. There will be a tab for 'Additional Content.'

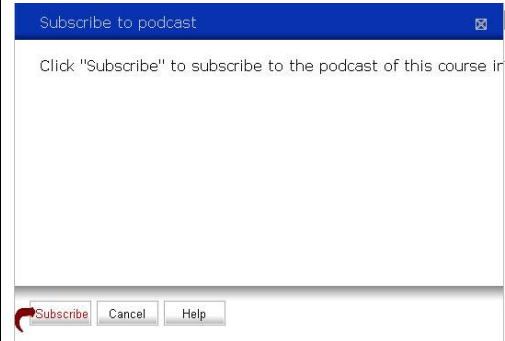

Search Features:

Students can search within a class recording or all the class recordings as well as additional content uploaded such as Word, Excel, and PowerPoint documents, and student recordings

Delivery Subscriptions:

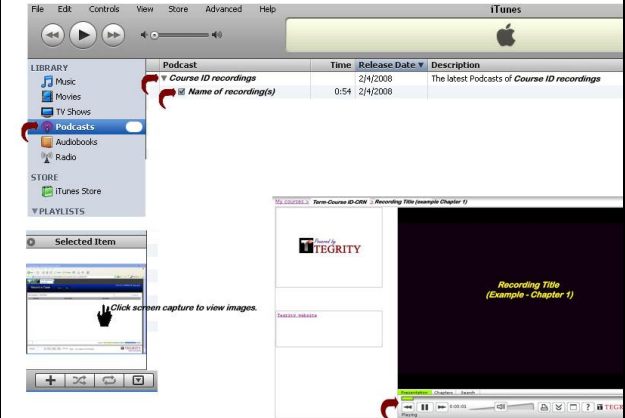

If your Instructor enabled the “Subscriptions” settings, students will be able to subscribe to Tegrity recordings using iPod/iTunes, Mp3, or RSS feeder.

1) For iPod (enhanced podcasting), the iTunes software will launch and begin downloading the class recordings.

Note: Refer to iTunes and iPod documentation for additional information and synchronizing podcasts.

Note: you must have iTunes installed. You can download iTunes for free at <http://www.apple.com/iTunes/download/PM>

2) For Mp3 (digital music player), when the dialog box appears, select “Copy to Clipboard”. Then paste the link into your podcasting application and click Close to dismiss the subscription dialog box.

Note: Refer to your digital music player and podcasting software documentation for additional information about listening to podcasts and synchronizing them to your digital music player.

Note:

In iTunes:

- Select “connect to an Internet broadcast.”
- Choose Advanced > Open Stream.
- Paste the URL from the Tegrity Viewer.
