Center for Professional, Career, and Technical Education

Dear Doctor and/or Clinical Site Supervisor,

Thank you for your interest in becoming an off-campus clinical instruction site for the Jefferson State Community College Veterinary Technology Program. As a clinical site, your facility, along with you and your staff, are a vital part of our reaching and maintaining the standards of excellence necessary for our program to become accredited by the AVMA. With your help, we will produce highly educated and skilled licensed veterinary technicians for the veterinary profession.

In order to meet AVMA accreditation requirements regarding practice quality, staff, and equipment, we have enclosed the following forms:

- 1) Facility Questionnaire
- 2) Equipment and Species Lists
- 3) Instructional Site Agreement Form

Please fill out and return forms 1, 2, and 3. The completed forms, along with additional forms if necessary, will be kept in a bound notebook for future reference and accreditation policy fulfillment. We will supply you with a list of equipment and supplies needed by the student for each course. If you do not have access to all of the needed supplies, we will make alternate arrangements for the student to complete the required task(s).

If you have any questions concerning this or any other procedures regarding the veterinary technology program, please do not hesitate to contact us at 205-856-8519 or 856-7701. We approach this endeavor with a spirit of team work and open communication and are happy to answer any questions you may have.

Sincerely,

A handwritten signature in cursive script that reads "Christie Wallace".

Christie Wallace, D.V.M.
Director

CW/plm

Please return forms 1, 2, and 3 to:

**VETERINARY TECHNOLOGY PROGRAM
OFF CAMPUS CLINICAL FACILITY
QUESTIONNAIRE**

1. Name of Veterinary Hospital or Clinic _____
Address _____
City, State, Zip Code _____
Telephone _____ Fax _____ E-mail _____

2. Is the clinic/hospital AAHA accredited? _____yes _____no
Is the clinic/hospital State approved? _____yes _____no Permit # _____

3. Names of veterinarians in practice	Owner	Associate	ALVMA Member
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____

4. Does the practice specialize in any areas? If so, please list them:

5. Do any of the veterinarians have specialty or board certified degrees? If so please give their name(s) and specialty or board certification.

6. If the practice employees are licensed veterinary technicians, please name them.
ALVTA Member

7. Please list the names of other staff and their positions.

8. Please provide us with a copy of your veterinary license(s) for any D.V.M. that may be observing and evaluating a student performing clinical work. If you have licensed technicians we need a copy of their license also. Please include a copy of your state inspection form. This is to verify to the AVMA that our clinical site supervisors are indeed licensed veterinarians or licensed veterinary technicians and they are in a state approved facility.

VETERINARY TECHNOLOGY PROGRAM EQUIPMENT AND INSTRUCTIONAL RESOURCES LIST

This AVMA checklist is designed to monitor resources used in educating veterinary technicians. Additional inventory items should be attached to this checklist. Show numbers of each item when applicable.

**Will be provided in a lab session when needed

STATE OF ALABAMA
JEFFERSON COUNTY

Veterinary Technology Distance Education Program

MEMORANDUM OF AGREEMENT
FOR
CLINICAL EDUCATION AFFILIATION

WHEREAS, Jefferson State Community College (the "College") and _____
_____ (the "Clinical Site")(collectively, the "Parties"), desiring to set out in writing the terms and
respective responsibilities in regard to a Veterinary Technology Distance Education Program (off- campus clinical
instruction and preceptorship site) in which both institutions participate, do hereby mutually agree on the following terms:

CLINICAL SITE RESPONSIBILITIES

1. The Clinical Site agrees that students enrolled in the Veterinary Technology Program at the College may utilize the appropriate clinical facilities, equipment, and supplies of the Clinical Site for related training and learning experiences during the days and hours agreed upon by the Parties. Students will be allowed to work or volunteer at the Clinical Site a minimum of 20 hours per week.
2. The Clinical Site will allow students to travel to other sites as needed to obtain skills that may not otherwise be available at the assigned site, and to take written or clinical exams as necessary.
3. The Clinical Site will provide opportunities for the appropriate staff members to meet with the program faculty and/or director for the purpose of matching educational objectives with learning opportunities and for mutually agreeing upon policies and guidelines for the clinical practicum and/or preceptorship. Program faculty and/or director shall be allowed to conduct site visits as necessary.
4. The Clinical Site shall provide data and other information as might be necessary in accreditation studies for the Program or College.
5. The learning activities of the students shall fit into and complement the service activities of the Clinical Site; provided, however, that students will not be used in lieu of regular employees and will not work without proper supervision by appropriately certified personnel.
6. The Clinical Site will provide the College with a copy of its licensed Veterinarians and Veterinary Technicians employed at its location. This information is needed for accreditation purposes.
7. The Clinical Site shall designate a Clinical Instructor or Associate (must be a licensed Veterinary Technician or Veterinarian) who will act as intermediary between the Clinical Site and College and will assume the responsibility of coordinating and supervising the in-house learning activities of students as planned with the Program's faculty

and/or director from the College, and verifying skills and tasks using specific criteria provided by the Veterinary Technology program.

8. The Clinical Instructor or Associate shall ensure that all student orientation, instruction, supervision, and evaluation are provided by employees who have the professional qualifications and experience to serve as Clinical Associates. Student progress may only be evaluated by a licensed veterinarian or a licensed veterinary technician.
9. The Clinical Instructor or Associate shall provide assistance as needed in monitoring written tests, maintaining written records and evaluations on each student, and providing appropriate information to the Program's faculty and/or director at times mutually agreed upon by both parties.
10. The Clinical Site may require the College to remove any student from the clinical rotation whose conduct or performance does not meet Clinical Site expectations. The Program's faculty and/or director, or the College will otherwise be responsible for any disciplinary actions taken against students.
11. As available, the Clinical Site shall provide first aid for accidents occurring to students while on the premises. The Clinical Site assumes no other responsibility for the health care of students.
12. The clinical supervisor will inform the Program's director if a student is not fulfilling the minimum requirement of 20 hours per week or if a student decides to change clinical sites.

COLLEGE RESPONSIBILITIES

1. The College shall seek accreditation of the program and provide data as might be necessary in accreditation studies of the Clinical Site.
2. The Program's faculty and/or director shall make regular on-site clinical visits for the purposes of communication and for review of clinical education effectiveness.
3. The College shall send to the Clinical Site only students who have qualified for clinical rotations and preceptorship, by successfully completing required courses and any other requirements of the program and its curriculum.
4. The College shall send to the Clinical Site the number of students mutually agreed upon by the Parties.
5. The College shall require students to meet the same dress code, punctuality, and other professional expectations of employees, and shall notify students that they may be subject to discipline by the Program for violations of such Clinical Site regulations.

6. The College shall inform students of their responsibility to maintain confidentiality with respect to all Clinical Site affairs, records, and patient data.
7. The College shall inform students that prior written approval from both the Clinical Site and the College must be obtained before publishing any material relative to the clinical rotations, and preceptorship.
8. The College shall require students to purchase personal liability insurance and to show proof of medical insurance. Students may purchase liability insurance through the College. No other liability is assumed for the student by either the Clinical Site or the College.
9. The College shall recommend that Veterinary Technology students be immunized against tetanus and rabies. It shall also require that any student who may become pregnant while enrolled in the program inform the program instructor and/or director immediately.
10. The College shall require students to have a current in force hospitalization/surgical insurance policy, unless they otherwise qualify for indigent care under the appropriate guidelines.

NONDISCRIMINATION PROVISION

The Parties agree that there shall be no discrimination on the basis of race, sex, age, color, creed, national origin, or disability in the assignment, acceptance, and activities of students in the program established by this agreement.

INDEPENDENT CONTRACTOR STATUS

It is understood and agreed that this Memorandum of Agreement is intended solely for the purpose of student clinical education and preceptorship experiences. It is not intended and shall not be construed to create an employment relationship between the College's employees, agents, or students and the Clinical Site. The Clinical Site and the College are at all times acting and performing as independent contractors. Students participating in clinical experiences and preceptorship will not receive compensation for participation as a student in the clinical/course experiences from the College. It is the sole discretion of the Clinical Site as to whether or not it will compensate students for clinical and preceptorship experiences.

TERMS OF THIS AGREEMENT

This agreement shall become effective for one year immediately upon being signed by the designated assignees of both the Clinical site and the College. This agreement shall be reviewed annually by appropriate representatives of both institutions and shall automatically renew itself for a period of one (1) year unless either party shall notify the other in writing ninety (90) days prior to the expiration of the terms herein. If notice of cancellation is necessary, it is understood

that those students already assigned to the Clinical Site will be allowed to finish their clinical requirements, if no disciplinary actions were involved.

If either party fails to fulfill the obligations assumed hereunder, the other party must give written notice of such default. If the default is not remedied within thirty (30) days after notice, the agreement may be terminated forthwith by such party. If either party's accreditation status changes, immediate notice must be given to the other party.

It is further understood that the parties hereto may revise or modify this agreement by written amendments whenever the same shall be agreed upon.
