

HEARING PROTECTION

COURSE OVERVIEW

This class will cover the OSHA Hearing Protection Standard (29 CFR 1910.95). All employees who work in high noise areas, as defined by the standard, are required to attend annual training on hearing conservation.

LEARNING OBJECTIVES

Topics in this class include:

- The overview of noise and its measurement.
- Health hazards of noise.
- Permissible noise levels.
- Monitoring; audiometric testing.
- Hearing protection, and sources of noise.
