

## **OSHA GENERAL INDUSTRY COURSE**

### **COURSE OVERVIEW**

This 10-hour course is intended to provide General Industry safety and health training to workers and supervisors. Emphasis is put on hazard identification, avoidance, control and prevention, not just OSHA standards. This course can be customized to include hazards and control procedures at your facility.

### **LEARNING OBJECTIVE**

Topics for this course will include:

- Introduction to OSHA
- Walking and Working Surfaces
- Exit Routes, Emergency Action Plans, Fire Prevention Plans, and Fire Protection
- Electrical

In addition to the topics listed above, up to six additional topics can be chosen from the following:

- Hazardous Materials
- Personal Protective Equipment
- Machine Guarding
- Hazard Communication
- Introduction to Industrial Hygiene/Bloodborne Pathogens, and/or Ergonomics
- Safety and Health Programs

At the completion of this course, each student will be given a test and will receive an OSHA student course completion card for the 10 hour General Industry Course.

### **AUDIENCE**

- Supervisors
- Employees

## **TYPICAL TIME INVESTMENT**

10 Hours of training
