

SOLVING WORKPLACE PROBLEMS

PROGRAM OVERVIEW

Solving Workplace Problems provides an effective approach and the tools necessary for improving current processes that organizations use to solve organizational problems. Through structured activities, participants learn how to identify the problem, identify the cause, select the best solution, implement the solution, and determine what feedback and follow-up will be required.

COURSE OVERVIEW

Solving Workplace Problems teaches managers a five-step process that combines a variety of methods to provide an effective approach to solving simple to complex organizational problems. Each step of the process is explained in detail. Participants have the opportunity to be involved in group discussions, apply the process learned using a case study, and finally apply the solution to their own problem.
